Differential pressure switch

Differential pressure switch

The differential pressure switch controls the backwash process of the fine filter in conjunction with the automatic backwash system and ensures fully automatic flushing of the fine filter.

- In conjunction with the automatic backwash system
- Adjustable differential pressure from 0.1 to 1.6 bar (factory-set to 1 bar)
- Maximum operating pressure of 16 bar
- Ready for connection incl. plug connection

Differential pressure switch	½" / ¾"	1" / 1 ¼"	1 ½" / 2"	DN 65 / DN 80 / DN 100
